## A. Introduction

The website that we created is a website about Polinema teaching systems. This website is divided into 2 levels of users, namely admin and lecturer. At the user admin level, it contains all the data of the teaching lecturer. Starting from personal information, teaching data, classes, lecturers' positions, lecturers' research groups, etc. Admin can update, add, read, delete data and download or upload data via excel. At the lecturer user level there is personal information about the lecturer, the teaching schedule of the lecturer concerned, the research group to be followed, and the courses taught. In this level user only can update personal information data. This website is crafted with CI and Laravel. Admin level with CI and Lecturer level with Laravel

## B. Databases

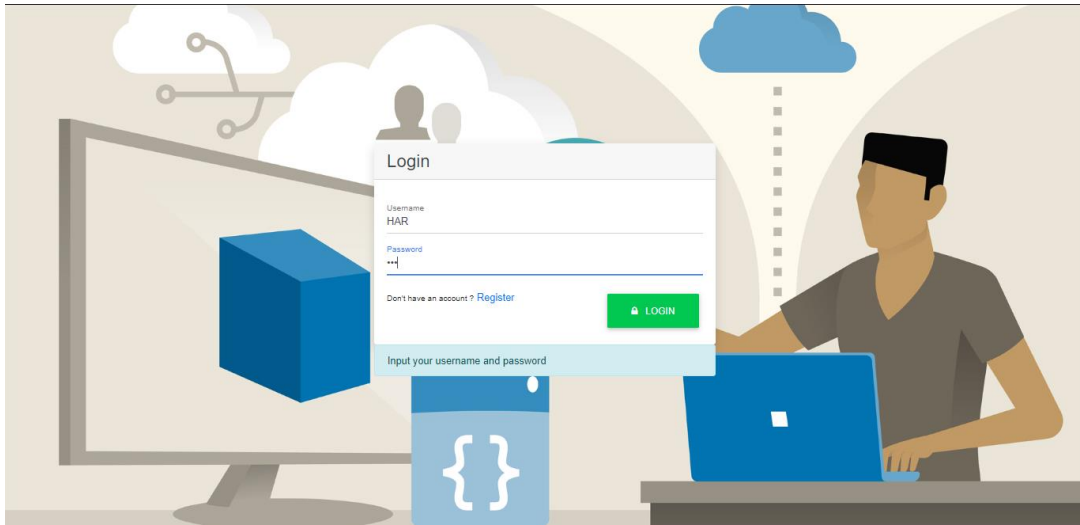

There are the database we use the left one is the main table in our database and the right one is the view for simplify the query, so the query doesn't need join.
